Dear Sir,

I recently graduated at California State University, Bakersfield with Computer Science degree and a GPA of 3.57 on May 2018. I am seeking an employment opportunity to utilize my programming knowledge and skills to help you achieve your mission.

Through my education, I have an expertise in C/C++, Python, JavaScript, PHP, CSS. My latest project was called Campus Connect, a social media and social networking service for California State University, Bakersfield students and other organizations. It exists as a full-stack web application that works with a MySQL database and takes advantage of a RESTful API for data management and communication between the client and the server. In this project, I designed the framework Campus Connect, connected to backend MySQL database, and creating queries.

Additionally, I developed strong management skills from 8 years work experience at my current job, Stockdale Ranch Market/Mobil gas station. I supervised 8 employees to ensure the store was fully operating, tracked inventory and repurchasing to ensure items were in full stock, and operated as the system administrator.

Attached for your consideration is my resume. I look forward to discussing with your about any opportunities. Thank you for your time.
